ARG11104 anti-NT-proBNP antibody [16F3]

Package: 100 μg Store at: -20°C

Summary

Product Description Mouse Monoclonal antibody [16F3] recognizes NT-proBNP

Tested Reactivity Hu

Tested Application ELISA, WB
Host Mouse

Clonality Monoclonal

Clone 16F3

Isotype IgG1

Target Name NT-proBNP Species Human

Immunogen Carrier protein-conjugated synthetic peptide corresponding to aa. 13-27 of Human NT-proBNP.

Conjugation Un-conjugated

Alternate Names 4-27; Natriuretic peptides B; 1-28; 1-29; 5-32; BNP; 1-32; 1-30; BNP-32; 5-29; 2-31; 4-30; 4-31; 4-32;

3-29; Gamma-brain natriuretic peptide; 3-30; 5-31; 3-32; 4-29

Application Instructions

Application table	Application	Dilution
	ELISA	Assay-dependent
	WB	Assay-dependent
Application Note	* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	

Properties

Form Liquid

Purification Purification with Protein A.

Buffer PBS (pH 7.4) and 0.09% Sodium azide.

Preservative 0.09% Sodium azide

Storage instruction For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot

and store at -20°C or below. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed

before use.

Note For laboratory research only, not for drug, diagnostic or other use.

Bioinformation

Gene Symbol NPPB

Gene Full Name natriuretic peptide B

Background This gene is a member of the natriuretic peptide family and encodes a secreted protein which functions

as a cardiac hormone. The protein undergoes two cleavage events, one within the cell and a second after secretion into the blood. The protein's biological actions include natriuresis, diuresis, vasorelaxation, inhibition of renin and aldosterone secretion, and a key role in cardiovascular homeostasis. A high concentration of this protein in the bloodstream is indicative of heart failure. The protein also acts as an antimicrobial peptide with antibacterial and antifungal activity. Mutations in this

gene have been associated with postmenopausal osteoporosis. [provided by RefSeq, Nov 2014]

Function Cardiac hormone which may function as a paracrine antifibrotic factor in the heart. Also plays a key role

in cardiovascular homeostasis through natriuresis, diuresis, vasorelaxation, and inhibition of renin and aldosterone secretion. Specifically binds and stimulates the cGMP production of the NPR1 receptor.

Binds the clearance receptor NPR3. [UniProt]

Calculated Mw 15 kDa

PTM The brain natriuretic peptide 32 form is cleaved at Pro-104 by the prolyl endopeptidase FAP (seprase)

activity (in vitro). [UniProt]

Cellular Localization Secreted. [UniProt]
