ARG11125 anti-PEA15 antibody [4D2]

Package: 50 μl Store at: -20°C

Summary

Mouse Monoclonal antibody [4D2] recognizes PEA15 **Product Description**

Tested Reactivity Ms, Rat, Cow

Predict Reactivity Hu

Tested Application IHC-Fr, WB

Host Mouse

Monoclonal Clonality

Clone Isotype lgG1

Target Name PEA15

Species Human

Immunogen Full-length Human PEA15.

4D2

Conjugation Un-conjugated

Alternate Names MAT1H; MAT1; Astrocytic phosphoprotein PEA-15; HUMMAT1H; 15 kDa phosphoprotein enriched in

astrocytes; PED; PEA-15; Phosphoprotein enriched in diabetes; HMAT1

Application Instructions

Application table	Application	Dilution
	IHC-Fr	1:1000 - 1:2000
	WB	1:1000 - 1:2000
Application Note	* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	
Observed Size	~ 15 kDa	

Properties

Form	Liquid	
Purification	Purified	
Buffer	PBS, 5 mM Sodium azide and 50% Glycerol.	
Preservative	5 mM Sodium azide	
Stabilizer	50% Glycerol	
Concentration	1 mg/ml	
Storage instruction	For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot and store at -20°C. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw	

For laboratory research only, not for drug, diagnostic or other use.

Bioinformation

Gene Symbol PEA15

Gene Full Name phosphoprotein enriched in astrocytes 15

Background This gene encodes a death effector domain-containing protein that functions as a negative regulator of

apoptosis. The encoded protein is an endogenous substrate for protein kinase C. This protein is also overexpressed in type 2 diabetes mellitus, where it may contribute to insulin resistance in glucose uptake. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Jul 2014]

Function Blocks Ras-mediated inhibition of integrin activation and modulates the ERK MAP kinase cascade.

Inhibits RPS6KA3 activities by retaining it in the cytoplasm (By similarity). Inhibits both TNFRSF6- and TNFRSF1A-mediated CASP8 activity and apoptosis. Regulates glucose transport by controlling both the content of SLC2A1 glucose transporters on the plasma membrane and the insulin-dependent trafficking

of SLC2A4 from the cell interior to the surface. [UniProt]

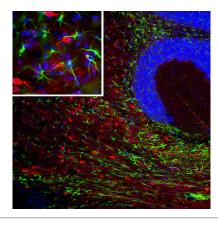

Calculated Mw 15 kDa

PTM Phosphorylated by protein kinase C and calcium-calmodulin-dependent protein kinase. These

phosphorylation events are modulated by neurotransmitters or hormones. [UniProt]

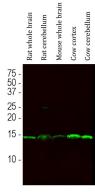

Cellular Localization Cytoplasm. Note=Associated with microtubules. [UniProt]

Images

ARG11125 anti-PEA15 antibody [4D2] IHC-Fr image

Immunohistochemistry: Frozen section of Rat brain tissue stained with ARG11125 anti-PEA15 antibody [4D2] (red) at 1:1000 dilution, and co-stained with anti-GFAP antibody (green) at 1:5000 dilution. Hoechst (blue) for nuclear staining. (Sample preparation: Following transcardial perfusion of rat with 4% paraformaldehyde, brain was post fixed for 24 hours, cut to 45 μM , and free-floating sections were stained with above antibodies.).

ARG11125 anti-PEA15 antibody [4D2] WB image

Western blot: Rat whole brain, Rat cerebellum, Mouse whole brain, Cow cortex and Cow cerebellum lysates stained with ARG11125 anti-PEA15 antibody [4D2] at 1:1000 dilution.
