# ARG23473 anti-CD32 antibody [CCG36]

Package: 50 μg Store at: -20°C

#### **Summary**

Product Description Mouse Monoclonal antibody [CCG36] recognizes CD32

Mouse anti Bovine CD32 antibody, clone CCG36 recognizes the bovine homologue of human CD32, one of a group of Fc receptors belonging to the immunoglobulin superfamily and involved in phagocytosis of opsonized microbes. Bovine CD32 is a single pass type 1 membrane protein of approximately 32kDa, expressed on the cell surface of most cells including B-lymphocytes, monocytes, neutrophils and afferent veiled lymph dendritic cells Chattha, K. et al. 2010. It has been shown that expression of bovine CD32 is higher on macrophages than on neutrophils. CD32 can function in an inhibitory capacity to antibody production and is the low affinity Fc receptor for IgG (FcRII), binding to the Fc region of immunoglobulin gamma Chattha et al. 2009. Clone CCG36 also recognizes ovine CD32.

Tested Reactivity Bov, Sheep
Tested Application FACS, IHC-Fr

Host Mouse

**Clonality** Monoclonal

Clone CCG36

Isotype IgG1
Target Name CD32
Species Bovine

Immunogen Bovine FcyRII-transfected COS7 cells.

Conjugation Un-conjugated

Alternate Names Fc-gamma-RIIc; Fc-gamma RII-c; CD32; CD antigen CD32; CD32B; IgG Fc receptor II-c; Low affinity

immunoglobulin gamma Fc region receptor II-c; FCG2; IGFR2; FcRII-c; FCGR2; CDw32

# **Application Instructions**

| Application table | Application  | Dilution        |
|-------------------|--|-----------------|
|                   | FACS   | Neat - 1:10     |
|                   | IHC-Fr   | Assay-dependent |
| Application Note  | FACS: Use 10 μl of the suggested working dilution to label 10^6 cells in 100 μl  * The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist |                 |

## **Properties**

| Form         | Liquid                       |
|--------------|------------------------------|
| Purification | Purification with Protein G. |
| Buffer       | PBS and 0.09% Sodium azide.  |
| Preservative | 0.09% Sodium azide           |
|              |                              |

Concentration 1 mg/ml

Storage instruction For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot

and store at -20°C or below. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed

before use.

Note For laboratory research only, not for drug, diagnostic or other use.

#### Bioinformation

Gene Symbol FCGR2B

Gene Full Name Fc fragment of IgG, low affinity Ilb, receptor (CD32)

Background The protein encoded by this gene is a low affinity receptor for the Fc region of immunoglobulin gamma

complexes. The encoded protein is involved in the phagocytosis of immune complexes and in the regulation of antibody production by B-cells. Variations in this gene may increase susceptibilty to systemic lupus erythematosus (SLE). Several transcript variants encoding different isoforms have been

found for this gene. [provided by RefSeq, Jun 2010]

Function Receptor for the Fc region of complexed immunoglobulins gamma. Low affinity receptor. Involved in a

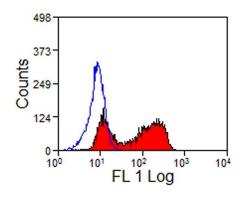

variety of effector and regulatory functions such as phagocytosis of immune complexes and modulation

of antibody production by B-cells. [UniProt]

Calculated Mw 36 kDa

PTM Phosphorylated by the SRC-type Tyr-kinases LYN and BLK. [UniProt]
