

## ARG24178 anti-Parainfluenza virus type 3 antibody

Package: 100 µg  
Store at: -20°C

### Summary

Product Description	Mouse Monoclonal antibody recognizes Parainfluenza virus type 3.
Tested Reactivity	Virus
Tested Application	ELISA, IHC-Fr
Host	Mouse
Clonality	Monoclonal
Isotype	IgG2a
Target Name	Parainfluenza Virus type 3
Immunogen	Crude viral lysate, native.
Conjugation	Un-conjugated
Alternate Names	HPIV-3; HPIV3

### Application Instructions

Application table	Application	Dilution
	ELISA	Assay-dependent
	IHC-Fr	Assay-dependent
Application Note	* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	

### Properties

Form	Liquid
Buffer	PBS and 0.09% Sodium Azide
Preservative	0.09% Sodium Azide
Concentration	1 mg/ml
Storage instruction	For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot and store at -20°C or below. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed before use.
Note	For laboratory research only, not for drug, diagnostic or other use.

### Bioinformation

Background	Human parainfluenza viruses (HPIVs) are the viruses that cause human parainfluenza. HPIVs are a paraphyletic group of four distinct single-stranded RNA viruses belonging to the Paramyxoviridae family. These viruses are closely associated with both human and veterinary disease. Virions are
------------	---

approximately 150–250 nm in size and contain negative sense RNA with a genome encompassing about 15,000 nucleotides.
