| ARG40626 | Package: $100 \mu \mathrm{l}$ |
| :--- | :--- |
| anti-c-Jun antibody | Store at: $-20^{\circ} \mathrm{C}$ |

## Summary

| Product Description | Rabbit Polyclonal antibody recognizes c-Jun |
| :--- | :--- |
| Tested Reactivity | $\mathrm{Hu}, \mathrm{Ms}$, Rat |
| Tested Application | ICC/IF, IHC-P, IP, WB |
| Host | Rabbit |
| Clonality | IgG |
| Isotype | C-Jun |
| Target Name | Human |
| Species | Synthetic peptide derived from Human c-Jun. |
| Immunogen | Un-conjugated |
| Conjugation | AP1; AP-1; Transcription factor AP-1; Proto-oncogene c-Jun; V-jun avian sarcoma virus 17 oncogene |
| Alternate Names |  |

Application Instructions

| Application table | Application | Dilution |
| :---: | :---: | :---: |
|  | ICC/IF | 1:50-1:200 |
|  | IHC-P | 1:50-1:200 |
|  | IP | 1:50 |
|  | WB | 1:500-1:2000 |
| Application Note | * The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist. |  |

Properties

| Form | Liquid |
| :--- | :--- |
| Purification | Affinity purified. |
| Buffer | PBS (pH 7.4), $150 \mathrm{mM} \mathrm{NaCl}, 0.02 \%$ Sodium azide and $50 \%$ Glycerol. |
| Preservative | $0.02 \%$ Sodium azide |
| Stabilizer | $50 \%$ Glycerol |
| Storage instruction | For continuous use, store undiluted antibody at $2-8^{\circ} \mathrm{C}$ for up to a week. For long-term storage, aliquot <br> and store at $-20^{\circ} \mathrm{C}$. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw <br> cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed before use. <br> Note |

## Bioinformation

| Gene Symbol | JUN |
| :--- | :--- |
| Gene Full Name | jun proto-oncogene |
| Background | This gene is the putative transforming gene of avian sarcoma virus 17. It encodes a protein which is <br> highly similar to the viral protein, and which interacts directly with specific target DNA sequences to <br> regulate gene expression. This gene is intronless and is mapped to 1p32-p31, a chromosomal region <br> involved in both translocations and deletions in human malignancies. [provided by RefSeq, Jul 2008] |
| Function | Transcription factor that recognizes and binds to the enhancer heptamer motif 5'-TGA[CG]TCA-3'. <br> Promotes activity of NR5A1 when phosphorylated by HIPK3 leading to increased steroidogenic gene <br> expression upon cAMP signaling pathway stimulation. [UniProt] |
| Calculated Mw Area | Cancer antibody; Gene Regulation antibody; Immune System antibody; Signaling Transduction <br> antibody; AP-1 early response transcription factor study antibody |
| 36 kDa |  |
| Ubiquitinated by the SCF(FBXW7), leading to its degradation. Ubiquitination takes place following |  |
| phosphorylation, that promotes interaction with FBXW7. |  |
