

ARG42254 Mouse IgG2a Isotype Control antibody [MOPC-173] (PerCP)

Package: 50 μg Store at: 4°C

Summary		
Product Description	PerCP-conjugated Mouse Monoclonal antibody [MOPC-173] as a negative control antibody for Mouse lgG2a	
Species Does Not React With	Hu, Ms, Rat	
Tested Application	Control, FACS	
Specificity	This mouse IgG2a monoclonal antibody (clone MOPC-173) reacts with an unknown epitope. It does not react with a variety of resting, activated, live, and fixed mouse, rat and human tissues.	
Host	Mouse	
Clonality	Monoclonal	
Clone	MOPC-173	
Isotype	lgG2a, kappa	
Target Name	Mouse IgG2a	
Immunogen	Induced by intraperitoneal injection of mineral oils into BALB/c mice.	
Conjugation	PerCP	

Application Instructions

Application table	Application	Dilution
	Control	Assay-dependent
	FACS	9 μg/ml
Application Note	Negative control: The reagent is intended as an isotype control to establish the amount of non-specific antibody binding. For your particular experiment, use the same concentration of this control antibody as the recommended working concentration of the antigen-specific antibody. Also, when working with prediluted antibodies, dilute the isotype control to the same concentration as is the concentration of the antigen-specific antibody in the prediluted antibody solution you are using. If under particular experimental conditions the background signal of the isotype control is too high (usually when working concentrations of used antibodies are above 10 μ g/ml of incubation mixture), change the conditions of your experiment to reduce the background.	

Properties

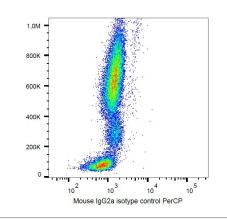

Form	Liquid	
Purification	Purified	
Buffer	PBS and 15 mM Sodium azide.	
Preservative	15 mM Sodium azide	
Concentration	0.1 mg/ml	

Aliquot and store in the dark at 2-8°C. Keep protected from prolonged exposure to light. Avoid repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed before use.

For laboratory research only, not for drug, diagnostic or other use.
