ARG42388 anti-DLL4 antibody [MHD4-46]

Package: 100 μg Store at: -20°C

Summary

Isotype

Product Description Mouse Monoclonal antibody [MHD4-46] recognizes DLL4

Tested Reactivity Hu
Tested Application FACS

Specificity The mouse monoclonal antibody MHD4-46 recognizes the extracellular domain of DLL4 (Delta-like

ligand 4), a type I transmembrane protein which plays an important role in vascular development.

Host Mouse

Clone MHD4-46

Target Name DLL4
Species Human

Immunogen Recombinant soluble Human DLL4.

IgG1, kappa

Conjugation Un-conjugated

Alternate Names Drosophila Delta homolog 4; hdelta2; Delta4; Delta-like protein 4

Application Instructions

Application table	Application	Dilution
	FACS	1 - 4 μg/ml
Application Note	* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	

Properties

Form Liquid

Purification Purification with Protein A.

Buffer PBS and 15 mM Sodium azide.

Preservative 15 mM Sodium azide

Concentration 1 mg/ml

Storage instruction For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot

and store at -20°C or below. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed

before use.

Note For laboratory research only, not for drug, diagnostic or other use.

Bioinformation

Gene Symbol DLL4

Gene Full Name delta-like 4 (Drosophila)

Background This gene is a homolog of the Drosophila delta gene. The delta gene family encodes Notch ligands that

are characterized by a DSL domain, EGF repeats, and a transmembrane domain. [provided by RefSeq,

Jul 2008]

Function Involved in the Notch signaling pathway as Notch ligand (PubMed:11134954). Activates NOTCH1 and

NOTCH4. Involved in angiogenesis; negatively regulates endothelial cell proliferation and migration and angiogenic sprouting (PubMed:20616313). Essential for retinal progenitor proliferation. Required for suppressing rod fates in late retinal progenitors as well as for proper generation of other retinal cell

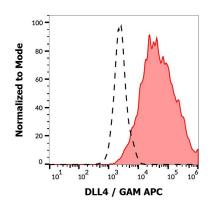

types (By similarity). During spinal cord neurogenesis, inhibits V2a interneuron fate

(PubMed:17728344). [UniProt]

Calculated Mw 75 kDa

Cellular Localization Cell membrane; Single-pass type I membrane protein. [UniProt]
