

ARG42426 anti-TSPAN7 antibody [B2D]

Package: 100 µg
Store at: -20°C

Summary

Product Description	Mouse Monoclonal antibody [B2D] recognizes TSPAN7
Tested Reactivity	Hu
Tested Application	FACS, IHC, IP, WB
Specificity	The mouse monoclonal antibody B2D recognizes an extracellular epitope of CD231 (TALLA-1, tetraspanin 7), a transmembrane glycoprotein expressed in neuronal tissue and T-ALL.
Host	Mouse
Clonality	Monoclonal
Clone	B2D
Isotype	IgG1
Target Name	TSPAN7
Species	Human
Immunogen	Human T-ALL cell line THP-6.
Conjugation	Un-conjugated
Alternate Names	A15; CCG-B7; Tetraspanin-7; Transmembrane 4 superfamily member 2; CD antigen CD231; TM4SF2; Tspan-7; Cell surface glycoprotein A15; TM4SF2b; CD231; DXS1692E; Membrane component chromosome X surface marker 1; T-cell acute lymphoblastic leukemia-associated antigen 1; TALLA-1; MRX58; MXS1

Application Instructions

Application table	Application	Dilution
	FACS	1 - 4 µg/ml
	IHC	Assay-dependent
	IP	Assay-dependent
	WB	Assay-dependent
Application Note	* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	

Properties

Form	Liquid
Purification	Purification with Protein A.
Buffer	PBS and 15 mM Sodium azide.
Preservative	15 mM Sodium azide

Concentration	1 mg/ml
Storage instruction	For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot and store at -20°C or below. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed before use.
Note	For laboratory research only, not for drug, diagnostic or other use.

Bioinformation

Gene Symbol	TSPAN7
Gene Full Name	tetraspanin 7
Background	The protein encoded by this gene is a member of the transmembrane 4 superfamily, also known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. This encoded protein is a cell surface glycoprotein and may have a role in the control of neurite outgrowth. It is known to complex with integrins. This gene is associated with X-linked cognitive disability and neuropsychiatric diseases such as Huntington's chorea, fragile X syndrome and myotonic dystrophy. [provided by RefSeq, Jul 2008]
Function	May be involved in cell proliferation and cell motility. [UniProt]
Calculated Mw	28 kDa
Cellular Localization	Membrane; Multi-pass membrane protein. [UniProt]
