

# **Product datasheet**

info@arigobio.com

# ARG42866 anti-TIMM44 antibody

Package: 100 μl Store at: -20°C

## **Summary**

Product Description Rabbit Polyclonal antibody recognizes TIMM44

Tested Reactivity Hu, Rat

Tested Application FACS, ICC/IF, IP, WB

Host Rabbit

**Clonality** Polyclonal

Isotype IgG

Target Name TIMM44

Species Human

Immunogen Recombinant protein of Human TIMM44.

Conjugation Un-conjugated

Alternate Names Mitochondrial import inner membrane translocase subunit TIM44; TIM44

# **Application Instructions**

Application table	Application	Dilution
	FACS	1:50
	ICC/IF	1:50
	IP	1:20
	WB	1:1000
Application Note	* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	
Positive Control	HeLa	
Observed Size	~ 44 kDa	

### **Properties**

Form	Liquid	
Purification	Affinity purified.	
Buffer	50 mM Tris-Glycine (pH 7.4), 150 mM NaCl, 0.01% Sodium azide, 40% Glycerol and 0.05% BSA.	
Preservative	0.01% Sodium azide	
Stabilizer	40% Glycerol and 0.05% BSA	
Concentration	Batch dependent	
Storage instruction	For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot	

and store at -20°C. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed before use.

Note

For laboratory research only, not for drug, diagnostic or other use.

#### Bioinformation

Gene Symbol TIMM44

Gene Full Name translocase of inner mitochondrial membrane 44 homolog (yeast)

Background This gene encodes a peripheral membrane protein associated with the mitochondrial inner membrane

translocase, which functions in the import of proteins across the mitochondrial inner membrane and into the mitochondrial matrix. The encoded protein mediates binding of mitochondrial heat shock protein 70 to the translocase of inner mitochondrial membrane 23 (TIM23) complex. Expression of this gene is upregulated in kidney in a mouse model of diabetes. A mutation in this gene is associated with

familial oncocytic thyroid carcinoma. [provided by RefSeq, Jul 2016]

Function Essential component of the PAM complex, a complex required for the translocation of transit peptide-

containing proteins from the inner membrane into the mitochondrial matrix in an ATP-dependent manner. Recruits mitochondrial HSP70 to drive protein translocation into the matrix using ATP as an

energy source. [UniProt]

Calculated Mw 51 kDa

Cellular Localization Mitochondrion inner membrane; Peripheral membrane protein; Matrix side. Mitochondrion matrix.

[UniProt]
