

ARG43186 anti-HLTF / SMARCA3 antibody

Package: 100 µl
Store at: -20°C

Summary

Product Description	Rabbit Polyclonal antibody recognizes HLTF / SMARCA3
Tested Reactivity	Hu, Ms, Rat
Tested Application	ICC/IF, IHC-P, WB
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Target Name	HLTF / SMARCA3
Species	Human
Immunogen	Synthetic peptide derived from Human HLTF / SMARCA3.
Conjugation	Un-conjugated
Alternate Names	SNF2L3; RNF80; DNA-binding protein/plasminogen activator inhibitor 1 regulator; EC 6.3.2.-; ZBU1; EC 3.6.4.-; SMARCA3; HLTF1; HIP116A; Sucrose nonfermenting protein 2-like 3; RING finger protein 80; SWI/SNF-related matrix-associated actin-dependent regulator of chromatin subfamily A member 3; HIP116; Helicase-like transcription factor

Application Instructions

Application table	Application	Dilution
	ICC/IF	1:50 - 1:200
	IHC-P	1:50 - 1:200
	WB	1:1000 - 1:5000
Application Note	* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	
Positive Control	K562	
Observed Size	~ 120 kDa	

Properties

Form	Liquid
Purification	Affinity purified.
Buffer	PBS (pH 7.4), 150 mM NaCl, 0.02% Sodium azide and 50% Glycerol.
Preservative	0.02% Sodium azide
Stabilizer	50% Glycerol
Storage instruction	For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot and store at -20°C. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw

cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed before use.

Note

For laboratory research only, not for drug, diagnostic or other use.

Bioinformation

Gene Symbol	HLTF
Gene Full Name	helicase-like transcription factor
Background	This gene encodes a member of the SWI/SNF family. Members of this family have helicase and ATPase activities and are thought to regulate transcription of certain genes by altering the chromatin structure around those genes. The encoded protein contains a RING finger DNA binding motif. Two transcript variants encoding the same protein have been found for this gene. However, use of an alternative translation start site produces an isoform that is truncated at the N-terminus compared to the full-length protein. [provided by RefSeq, Jul 2008]
Function	Has both helicase and E3 ubiquitin ligase activities. Possesses intrinsic ATP-dependent nucleosome-remodeling activity; This activity may be required for transcriptional activation or repression of specific target promoters (By similarity). These may include the SERPINE1 and HIV-1 promoters and the SV40 enhancer, to which this protein can bind directly. Plays a role in error-free postreplication repair (PRR) of damaged DNA and maintains genomic stability through acting as a ubiquitin ligase for 'Lys-63'-linked polyubiquitination of chromatin-bound PCNA. [UniProt]
Calculated Mw	114 kDa
Cellular Localization	Cytoplasm. Nucleus. Nucleus, nucleolus. Nucleus, nucleoplasm. Note=Nuclear localization is stimulated by progesterone. [UniProt]
