# ARG43443 anti-ST8sia1 antibody

Package: 100 μl Store at: -20°C

## **Summary**

Isotype

Product Description Rabbit Polyclonal antibody recognizes ST8sia1

IgG

Tested Reactivity Ms
Tested Application WB

Host Rabbit

**Clonality** Polyclonal

Target Name ST8sia1

Species Human

Immunogen Recombinant fusion protein corresponding to aa. 49-270 of Human ST8sia1 (NP\_003025.1).

Conjugation Un-conjugated

Alternate Names SIAT8A; Sialyltransferase 8A; Ganglioside GT3 synthase; SIAT8; Alpha-2,8-sialyltransferase 8A; EC

2.4.99.8; Alpha-N-acetylneuraminide alpha-2,8-sialyltransferase; Ganglioside GD3 synthase; ST8Sial;

GD3S; SIAT8-A; Sialyltransferase St8Sia I

# **Application Instructions**

Application table	Application	Dilution
	WB	1:500 - 1:2000
Application Note	* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	
Positive Control	SGC-7901	
Observed Size	~ 41 kDa	

### **Properties**

Form Liquid

Purification Affinity purified.

Buffer PBS (pH 7.3), 0.02% Sodium azide and 50% Glycerol.

Preservative 0.02% Sodium azide

Stabilizer 50% Glycerol

Storage instruction For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot

and store at -20°C. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed before use.

Note For laboratory research only, not for drug, diagnostic or other use.

#### Bioinformation

Gene Symbol ST8SIA1

Gene Full Name ST8 alpha-N-acetyl-neuraminide alpha-2,8-sialyltransferase 1

Background Gangliosides are membrane-bound glycosphingolipids containing sialic acid. Ganglioside GD3 is known

to be important for cell adhesion and growth of cultured malignant cells. The protein encoded by this gene is a type II membrane protein that catalyzes the transfer of sialic acid from CMP-sialic acid to GM3 to produce gangliosides GD3 and GT3. The encoded protein may be found in the Golgi apparatus and is a member of glycosyltransferase family 29. Alternatively spliced transcript variants have been found for

this gene. [provided by RefSeq, Jan 2015]

Function Involved in the production of gangliosides GD3 and GT3 from GM3; gangliosides are a subfamily of

complex glycosphinglolipds that contain one or more residues of sialic acid. [UniProt]

Calculated Mw 41 kDa

Cellular Localization Golgi apparatus membrane; Single-pass type II membrane protein. [UniProt]
