ARG44244 anti-CD154 / CD40L antibody [24-31] (APC)

Package: 100 tests Store at: 4°C

Summary

Product Description APC-conjugated Mouse Monoclonal antibody [24-31]recognizes CD154 / CD40L

Tested Reactivity Hu, NHuPrm

Tested Application FACS

Host Mouse

Clonality Monoclonal

Clone 24-31

Isotype IgG1

Target Name CD154 / CD40L

Species Human

Immunogen Human CD154 fusion protein.

Conjugation APC

Alternate Names TNFSF5; IMD3; T-cell antigen Gp39; HIGM1; CD40-L; gp39; CD40 ligand; Tumor necrosis factor ligand

superfamily member 5; CD40L; CD154; TRAP; CD antigen CD154; hCD40L; IGM; T-BAM; TNF-related

activation protein

Application Instructions

Application table	Application	Dilution
	FACS	10 μl / 10^6 cells
Application Note	* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	

Properties

Form Liquid

Purification Purified

Buffer PBS (pH 7.4) and 15 mM Sodium azide.

Preservative 15 mM Sodium azide

Storage instruction Aliquot and store in the dark at 2-8°C. Keep protected from prolonged exposure to light. Do not freeze.

Suggest spin the vial prior to opening. The antibody solution should be gently mixed before use.

Note For laboratory research only, not for drug, diagnostic or other use.

Bioinformation

|--|

Gene Full Name CD40 ligand

Background The protein encoded by this gene is expressed on the surface of T cells. It regulates B cell function by

engaging CD40 on the B cell surface. A defect in this gene results in an inability to undergo immunoglobulin class switch and is associated with hyper-IgM syndrome. [provided by RefSeq, Jul

2008]

Function Mediates B-cell proliferation in the absence of co-stimulus as well as IgE production in the presence of

IL-4. Involved in immunoglobulin class switching.

Release of soluble CD40L from platelets is partially regulated by GP IIb/IIIa, actin polymerization, and an

matrix metalloproteinases (MMP) inhibitor-sensitive pathway. [UniProt]

PTM The soluble form derives from the membrane form by proteolytic processing.

N-linked glycan is a mixture of high mannose and complex type. Glycan structure does not influence

binding affinity to CD40.

Not O-glycosylated. [UniProt]

Cell membrane; Single-pass type II membrane protein. Cell surface. CD40 ligand, soluble form:

Secreted. [UniProt]
