ARG56565 anti-CXCR7 / CD187 antibody

Package: 50 μl Store at: -20°C

Summary

Product Description Rabbit Polyclonal antibody recognizes CXCR7 / CD187

Tested Reactivity Hu, Ms

Predict Reactivity Rat

Tested Application WB

Host Rabbit
Clonality Polyclonal

Isotype IgG

Target Name CXCR7 / CD187

Species Human

Immunogen Recombinant protein of Human CXCR7.

Conjugation Un-conjugated

Alternate Names ACKR3; Atypical Chemokine Receptor 3; GPR159; RDC1; Chemokine Orphan Receptor 1; CMKOR1;

CXCR7; G-Protein Coupled Receptor RDC1 Homolog; Chemokine (C-X-C Motif) Receptor 7; C-X-C Chemokine Receptor Type 7; G-Protein Coupled Receptor 159; CXC-R7; CXCR-7; RDC-1; G Protein-

Coupled Receptor

Application Instructions

Application table	Application	Dilution
	WB	1:500 - 1:2000
• •	* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	

Properties

Form Liquid

Purification Affinity purification with immunogen.

Buffer PBS (pH 7.3), 0.02% Sodium azide and 50% Glycerol.

Preservative 0.02% Sodium azide

Stabilizer 50% Glycerol

Storage instruction For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot

and store at -20°C. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed before use.

Note For laboratory research only, not for drug, diagnostic or other use.

Bioinformation

Database links GeneID: 12778 Mouse

GeneID: 57007 Human

Swiss-port # P25106 Human

Swiss-port # P56485 Mouse

Gene Symbol ACKR3

Gene Full Name atypical chemokine receptor 3

Background This gene encodes a member of the G-protein coupled receptor family. Although this protein was

earlier thought to be a receptor for vasoactive intestinal peptide (VIP), it is now considered to be an orphan receptor, in that its endogenous ligand has not been identified. The protein is also a coreceptor for human immunodeficiency viruses (HIV). Translocations involving this gene and HMGA2 on

chromosome 12 have been observed in lipomas. [provided by RefSeq, Jul 2008]

Function Atypical chemokine receptor that controls chemokine levels and localization via high-affinity chemokine

binding that is uncoupled from classic ligand-driven signal transduction cascades, resulting instead in chemokine sequestration, degradation, or transcytosis. Also known as interceptor (internalizing receptor) or chemokine-scavenging receptor or chemokine decoy receptor. Acts as a receptor for

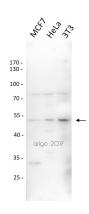

chemokines CXCL11 and CXCL12/SDF1. [Uniprot]

Calculated Mw 41 kDa

PTM Disulfide bond, Glycoprotein, Phosphoprotein, Ubl conjugation. [Uniprot]

Cellular Localization Cell membrane, Endosome, Membrane. [Uniprot]
