ARG57942 anti-Properdin antibody

Package: 100 μl Store at: -20°C

Summary

Product Description Rabbit Polyclonal antibody recognizes Properdin

Tested Reactivity Hu, Ms, Rat

Tested Application ICC/IF, IHC-P, WB

Host Rabbit

Clonality Polyclonal

Isotype IgG

Target Name Properdin
Species Human

Immunogen Recombinant fusion protein corresponding to aa. 190-469 of Human Properdin (NP_001138724.1).

Conjugation Un-conjugated

Alternate Names PFC; PFD; BFD; PROPERDIN; Complement factor P; Properdin

Application Instructions

| Application table | Application | Dilution |
|-------------------|--|----------------|
| | ICC/IF | 1:50 - 1:200 |
| | IHC-P | 1:50 - 1:200 |
| | WB | 1:500 - 1:2000 |
| Application Note | * The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist. | |
| Positive Control | 3T3L1 | |

Properties

| Form | Liquid | |
|---------------------|---|--|
| Purification | Affinity purified. | |
| Buffer | PBS (pH 7.3), 0.02% Sodium azide and 50% Glycerol. | |
| Preservative | 0.02% Sodium azide | |
| Stabilizer | 50% Glycerol | |
| Storage instruction | For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot and store at -20°C. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed before use. | |
| Note | For laboratory research only, not for drug, diagnostic or other use. | |

Bioinformation

Gene Symbol

CFP

Gene Full Name

complement factor properdin

Background

This gene encodes a plasma glycoprotein that positively regulates the alternative complement pathway of the innate immune system. This protein binds to many microbial surfaces and apoptotic cells and stabilizes the C3- and C5-convertase enzyme complexes in a feedback loop that ultimately leads to formation of the membrane attack complex and lysis of the target cell. Mutations in this gene result in two forms of properdin deficiency, which results in high susceptibility to meningococcal infections. Multiple alternatively spliced variants, encoding the same protein, have been identified.[provided by

RefSeq, Feb 2009]

Function

A positive regulator of the alternate pathway of complement. It binds to and stabilizes the C3- and

C5-convertase enzyme complexes. [UniProt]

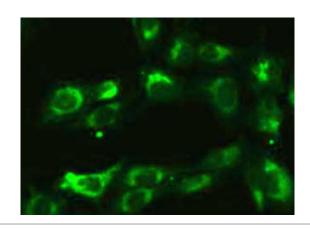

Calculated Mw

51 kDa

Cellular Localization

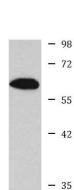

Secreted. [UniProt]
