

### ARG62815 anti-EpCAM antibody [323/A3]

Package: 100 μg Store at: -20°C

# Summary

| Product DescriptionMouse Monoclonal antibody [323/A3] recognizes CD326 / EpCAMTested ReactivityHuSpecies Does Not React WithRatTested ApplicationFACS, ICC/IF, IHC-P, IP, WBSpecificityThe clone 323/A3 recognizes CD326 / EpCAM, a marker of epithelial lineages, that is over-expressed in<br>many carcinomas.HostMouseClonalityMonoclonalClonalityMonoclonalSpecificityigG1Target NameEpCAMSpeciesHuman breast cancer MCF-7 cells_x000D_ConjugationUn-conjugatedAlternate NamesMIC18; EGP, Tumor associated antigen; HNPCC8; cell surface glycoprotein 314; KS4; Ep-CAM;<br>Epithelial cell surface antigen; X4 antigen; ESA; DIARS; EGP314; Epithelial cell adhesion<br>molecule; EGP-2; TROP1; CD antigen CD326   |                             |  |

# **Application Instructions**

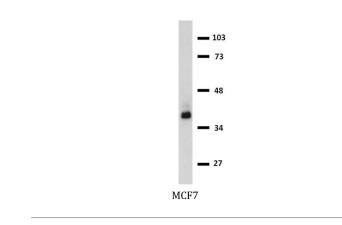

| Application table | Application   | Dilution   |
|-------------------|---|--|
|                   | FACS  | 1 - 4 μg/ml  |
|                   | ICC/IF  | 1 - 10 μg/ml   |
|                   | IHC-P   | 1 - 10 μg/ml   |
|                   | IP  | 1 - 4 μg/ml / 100 - 500 μg of protein in 1 ml lysate |
|                   | WB  | 1 - 2 μg/ml  |
| Application Note  | <ul> <li>IHC-P: Pretreatment: Tissue section digestion with pepsin (15 min at RT or 10 min at 37°C, 1 mg / ml Tris-HCl, pH 2.0).</li> <li>* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.</li> </ul> |  |
| Positive Control  | WB: A431, MCF7 and SW480<br>IHC-P: Breast carcinoma   |  |

# Properties

| Form                | Liquid  |
|---------------------|---|
| Purification        | Purified from cell culture supernatant by protein-A affinity chromatography.  |
| Purity              | > 95% (by SDS-PAGE)   |
| Buffer              | PBS (pH 7.4) and 15 mM Sodium azide   |
| Preservative        | 15 mM Sodium azide  |
| Concentration       | 1 mg/ml   |
| Storage instruction | For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot<br>and store at -20°C or below. Storage in frost free freezers is not recommended. Avoid repeated<br>freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed<br>before use. |
| Note                | For laboratory research only, not for drug, diagnostic or other use.  |

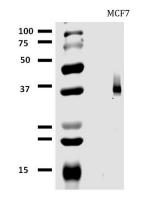

## Bioinformation

| Database links | GenelD: 4072 Human   |
|----------------|--|
|                | Swiss-port # P16422 Human  |
| Gene Symbol    | EPCAM  |
| Gene Full Name | epithelial cell adhesion molecule  |
| Background     | EpCAM is a carcinoma-associated antigen and is a member of a family that includes at least two type I membrane proteins. This antigen is expressed on most normal epithelial cells and gastrointestinal carcinomas and functions as a homotypic calcium-independent cell adhesion molecule. The antigen is being used as a target for immunotherapy treatment of human carcinomas. Mutations in this gene result in congenital tufting enteropathy. [provided by RefSeq, Dec 2008] |
| Function       | EpCAM may act as a physical homophilic interaction molecule between intestinal epithelial cells (IECs) and intraepithelial lymphocytes (IELs) at the mucosal epithelium for providing immunological barrier as a first line of defense against mucosal infection. Plays a role in embryonic stem cells proliferation and differentiation. Up-regulates the expression of FABP5, MYC and cyclins A and E. [UniProt]   |
| Research Area  | Controls and Markers antibody; Epithelial Marker antibody; Circulating Tumor Cells BioMarker antibody  |
| Calculated Mw  | 35 kDa   |
| РТМ            | Hyperglycosylated in carcinoma tissue as compared with autologous normal epithelia. Glycosylation at Asn-198 is crucial for protein stability.   |

### ARG62815 anti-EpCAM antibody [323/A3] WB image

Western blot: MCF7 whole cell lysate stained with ARG62815 anti-EpCAM antibody [323/A3], in non-reducing conditions.
