Bioinformation

Database links	GeneID: 115703 Human Swiss-port # O14559 Human
Background	This gene encodes a member of the sorting nexin family. Members of this family contain a phox (PX) domain, which is a phosphoinositide binding domain, and are involved in intracellular trafficking. Alternative splice variants encoding different isoforms have been identified in this gene. [provided by RefSeq, Feb 2010]
Research Area	Signaling Transduction antibody
