

ARG65035 anti-HMGA2 / HMGI-C antibody

Package: 100 μg Store at: -20°C

Summary

Product DescriptionGoat Polyclonal antibody recognizes HMGA2 / HMGI-CTested ReactivityHuPredict ReactivityDogTested ApplicationWBSpecificityThis antibody is expected to recognize both reported isoforms (NP_003474.1; NP_003475.1) and is not expected to cross-react with HMGA1.HostGoatClonalityPolyclonalNoglandPolyclonalIsotypeIgGTarget NameHMGA2 / HMGI-CImmunogenCKAAQKKAEATGEKConjugationUn-conjugatedAlternate NamesMGIC; BABL; LIPO; HMGI-C; High mobility group AT-hook protein 2; STQTL9; High mobility group

Application Instructions

Application table	Application	Dilution
	WB	1 - 3 μg/ml
Application Note	WB: Recommend incubate at RT for 1h. * The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	

Properties

Form	Liquid	
Purification	Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.	
Buffer	Tris saline (pH 7.3), 0.02% Sodium azide and 0.5% BSA	
Preservative	0.02% Sodium azide	
Stabilizer	0.5% BSA	
Concentration	0.5 mg/ml	
Storage instruction	For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot and store at -20°C or below. Storage in frost free freezers is not recommended. Avoid repeated	

freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed before use.

Note

For laboratory research only, not for drug, diagnostic or other use.

Bioinformation

Database links	GenelD: 8091 Human
	Swiss-port # P52926 Human
Background	This gene encodes a protein that belongs to the non-histone chromosomal high mobility group (HMG) protein family. HMG proteins function as architectural factors and are essential components of the enhancesome. This protein contains structural DNA-binding domains and may act as a transcriptional regulating factor. Identification of the deletion, amplification, and rearrangement of this gene that are associated with myxoid liposarcoma suggests a role in adipogenesis and mesenchymal differentiation. A gene knock out study of the mouse counterpart demonstrated that this gene is involved in diet-induced obesity. Alternate transcriptional splice variants, encoding different isoforms, have been characterized. [provided by RefSeq, Jul 2008]
Research Area	Cancer antibody; Developmental Biology antibody; Gene Regulation antibody; Metabolism antibody; Neuroscience antibody
Calculated Mw	12 kDa
PTM	Regulated by cell cycle-dependent phosphorylation which alters its DNA binding affinity. Phosphorylated by NEK2 (By similarity).
