

## Product datasheet

info@arigobio.com

# ARG65417 anti-CD103 / Integrin alpha E antibody [Ber-ACT8]

Package: 100 μg Store at: -20°C

#### **Summary**

Product Description Mouse Monoclonal antibody [Ber-ACT8] recognizes CD103 / Integrin alpha E

Tested Reactivity Hu, NHuPrm

Tested Application CyTOF®-candidate, FACS, IHC-Fr, IP, WB

Specificity The clone Ber-ACT8 recognizes CD103 (alpha E integrin), a type I transmembrane glycoprotein primarily

found on intestinal intraepithelial lymphocytes.

HLDA V; WS Code A067

Host Mouse

Clone Monoclonal

Ber-ACT8

Isotype IgG1

Target Name CD103 / Integrin alpha E

Species Human

Immunogen HTLV-1 induced human T cell line MAPS16

Conjugation Un-conjugated

Alternate Names CD103; HUMINAE; Integrin alpha-E; Mucosal lymphocyte 1 antigen; CD antigen CD103; HML-1 antigen;

Integrin alpha-IEL

#### **Application Instructions**

Application table	Application	Dilution
	CyTOF®-candidate	Assay-dependent
	FACS	1 - 4 µg/ml
	IHC-Fr	Assay-dependent
	IP	Assay-dependent
	WB	Assay-dependent
Application Note	* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	

### **Properties**

Form	Liquid	
Purification	Purified from cell culture supernatant by protein-A affinity chromatography.	
Purity	> 95% (by SDS-PAGE)	
Buffer	PBS (pH 7.4) and 15 mM Sodium azide	

Preservative 15 mM Sodium azide

Concentration 1 mg/ml

Storage instruction For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot

and store at -20°C or below. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed

before use.

Note For laboratory research only, not for drug, diagnostic or other use.

#### Bioinformation

Database links <u>GeneID: 3682 Human</u>

Swiss-port # P38570 Human

Gene Symbol ITGAE

Gene Full Name integrin, alpha E (antigen CD103, human mucosal lymphocyte antigen 1; alpha polypeptide)

Background CD103 / Integrin alphaE is an integrin subunit that is expressed on intraepithelial lymphocytes,

epithelial dendritic cells, lamina propria-derived dendritic cells, a subpopulation of lamina propria T cells, a small subset of peripheral lymphocytes, namely T reg cells, and on activated and TGF-beta stimulated lymphocytes. CD103 is in mature form cleaved into two disulfide-linked chains (C-terminal 150 kDa chain and N-terminal 25 kDa chain). It heterodimerizes with integrin beta7 subunit to form alphaE/beta7 integrin (mucosal lymphocyte 1 antigen), which through binding E-cadherin mediates homing of lymphocytes to the intestinal epithelium, and, in addition to the role in adhesion, may serve

as an accessory molecule for intraepithelial lymphocyte activation.

Function Integrin alpha-E/beta-7 is a receptor for E-cadherin. It mediates adhesion of intra-epithelial T-

lymphocytes to epithelial cell monolayers. [UniProt]
