# ARG67147 anti-SNAIL antibody

Package: 100 μl Store at: -20°C

#### **Summary**

Product Description Rabbit Polyclonal antibody recognizes SNAIL

Tested Reactivity Hu, Ms
Predict Reactivity Mk

Tested Application IHC-P, WB

Host Rabbit

**Clonality** Polyclonal

Isotype IgG

Target Name SNAIL

Species Human

Immunogen Synthesized peptide corresponding to a.a. 215-264 of Human SNAIL.

Conjugation Un-conjugated

Alternate Names SNAI1; Snail Family Transcriptional Repressor 1; SNAH; SLUGH2; SNAIL1; SNAIL; SNA; Snail Family Zinc

Finger 1; Zinc Finger Protein SNAI1; Protein Snail Homolog 1; Protein Sna; Snail 1 (Drosophila Homolog), Zinc Finger Protein; Snail Homolog 1 (Drosophila); Snail 1 Zinc Finger Protein; Snail 1 Homolog; Snail

Homolog 1; DJ710H13.1

### **Application Instructions**

| Application table | Application                                                                                                                                | Dilution       |
|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------|----------------|
|                   | IHC-P                                                                                                                                      | 1:100 - 1:300  |
|                   | WB                                                                                                                                         | 1:500 - 1:2000 |
| Application Note  | * The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist. |                |

#### **Properties**

Form Liquid

Purification Affinity purified

Buffer PBS with 50% glycerol, 0.5% BSA and 0.02% sodium azide

Preservative 0.02% Sodium azide

Stabilizer 50% glycerol and 0.5% BSA

**Storage instruction** For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot

and store at -20°C or below. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed

before use.

#### Bioinformation

Gene Symbol SNAI1

Gene Full Name Snail Family Transcriptional Repressor 1

Background The Drosophila embryonic protein snail is a zinc finger transcriptional repressor which downregulates

the expression of ectodermal genes within the mesoderm. The nuclear protein encoded by this gene is structurally similar to the Drosophila snail protein, and is also thought to be critical for mesoderm formation in the developing embryo. At least two variants of a similar processed pseudogene have

been found on chromosome 2. [provided by RefSeq, Jul 2008]

Function Involved in induction of the epithelial to mesenchymal transition (EMT), formation and maintenance of

embryonic mesoderm, growth arrest, survival and cell migration. Binds to 3 E-boxes of the E-cadherin/CDH1 gene promoter and to the promoters of CLDN7 and KRT8 and, in association with histone demethylase KDM1A which it recruits to the promoters, causes a decrease in dimethylated H3K4 levels and represses transcription. Associates with EGR1 and SP1 to mediate tetradecanoyl phorbol acetate (TPA)-induced up-regulation of CDKN2B, possibly by binding to the CDKN2B promoter

region 5'-TCACA-3. In addition, may also activate the CDKN2B promoter by itself. [UniProt]
