## ARG82263 Cellular Senescence Staining Kit (Fluorometric)

Package: 10 assay Store at: 4°C

#### **Summary**

Product Description ARG82263 Cellular Senescence Staining Kit (Fluorometric) can be used to measure activity of

senescence-associated beta Galactosidase in cells or tissue samples by fluorescence microscopy or flow

cytometry.

Tested Reactivity All

Tested Application FACS, FuncSt, ICC/IF

Target Name senescence-associated beta Galactosidase

Conjugation Note  $\lambda$  ex/em = 485 / 520 nm (fluorometric)

Sample Type Cells or tissue samples.

Sample Volume Each kit provides sufficient quantities to perform up to 10 assays in 35 mm dishes.

### **Application Instructions**

**Application Note** Please note that this kit does not include a microplate.

Assay Time 6 hours to overnight.

#### **Properties**

Form Liquid

Storage instruction Store the kit at 2-8°C. Do not expose test reagents to heat, sun or strong light during storage and usage.

Please refer to the product user manual for detail temperatures of the components.

Note For laboratory research only, not for drug, diagnostic or other use.
