

ARG82615 Mouse AHSG ELISA Kit

Package: 96 wells
Store at: 4°C

Summary

Product Description	ARG82615 Mouse AHSG ELISA Kit is an Enzyme Immunoassay kit for the quantification of Mouse AHSG in serum, plasma and cell culture supernatants.
Tested Reactivity	Ms
Tested Application	ELISA
Target Name	AHSG
Conjugation	HRP
Conjugation Note	Substrate: TMB and read at 450 nm.
Sensitivity	312.5 pg/ml
Sample Type	Serum, plasma and cell culture supernatants.
Standard Range	625 - 40000 pg/ml
Sample Volume	100 µl
Precision	Intra-Assay CV: 2.7% Inter-Assay CV: 4.1%
Alternate Names	A2HS; Alpha-2-HS-glycoprotein; HSGA; Ba-alpha-2-glycoprotein; AHS; FETUA; Alpha-2-Z-globulin; Fetuin-A

Properties

Form	96 well
Storage instruction	Store the kit at 2-8°C. Keep microplate wells sealed in a dry bag with desiccants. Do not expose test reagents to heat, sun or strong light during storage and usage. Please refer to the product user manual for detail temperatures of the components.
Note	For laboratory research only, not for drug, diagnostic or other use.

Bioinformation

Gene Symbol	AHSG
Gene Full Name	alpha-2-HS-glycoprotein
Background	Alpha2-HS glycoprotein (AHSG), a glycoprotein present in the serum, is synthesized by hepatocytes. The AHSG molecule consists of two polypeptide chains, which are both cleaved from a proprotein encoded from a single mRNA. It is involved in several functions, such as endocytosis, brain development and the formation of bone tissue. The protein is commonly present in the cortical plate of the immature cerebral cortex and bone marrow hemopoietic matrix, and it has therefore been postulated that it participates in the development of the tissues. However, its exact significance is still obscure. [provided by RefSeq, Jul 2008]
Function	Promotes endocytosis, possesses opsonic properties and influences the mineral phase of bone. Shows affinity for calcium and barium ions. [UniProt]

PTM	Phosphorylated by FAM20C in the extracellular medium. O- and N-glycosylated. O-glycosylated with core 1 or possibly core 8 glycans. N-glycan at Asn-156: Hex5HexNAc4; N-glycan heterogeneity at Asn-176: Hex5HexNAc4 (major) and Hex6HexNAc5 (minor). [UniProt]
Cellular Localization	Secreted. [UniProt]
