

## ARG82903 Monkey CD56 / NCAM ELISA Kit

Package: 96 wells  
Store at: 4°C

### Summary

Product Description	ARG82903 Monkey CD56 / NCAM ELISA Kit is an Enzyme Immunoassay kit for the quantification of Monkey CD56 / NCAM in serum, plasma (heparin, EDTA) and cell culture supernatants.
Tested Reactivity	Mk
Tested Application	ELISA
Specificity	There is no significant cross-reactivity or interference between NCAM1 and its analogs was observed. This claim is limited by existing techniques therefore cross-reactivity may exist with untested analogs.
Target Name	CD56 / NCAM
Conjugation	HRP
Conjugation Note	Substrate: TMB and read at 450 nm.
Sensitivity	78 pg/ml
Sample Type	Serum, plasma (heparin, EDTA) and cell culture supernatants.
Standard Range	156 - 10000 pg/ml
Sample Volume	100 µl
Precision	Intra-Assay CV: 6.13% Inter-Assay CV: 7.5%
Alternate Names	CD56; NCAM; CD antigen CD56; N-CAM-1; MSK39; NCAM-1; Neural cell adhesion molecule 1

### Application Instructions

Assay Time ~ 5 hours

### Properties

Form	96 well
Storage instruction	Store the kit at 2-8°C. Keep microplate wells sealed in a dry bag with desiccants. Do not expose test reagents to heat, sun or strong light during storage and usage. Please refer to the product user manual for detail temperatures of the components.
Note	For laboratory research only, not for drug, diagnostic or other use.

### Bioinformation

Gene Symbol	NCAM1
Gene Full Name	neural cell adhesion molecule 1
Background	This gene encodes a cell adhesion protein which is a member of the immunoglobulin superfamily. The encoded protein is involved in cell-to-cell interactions as well as cell-matrix interactions during development and differentiation. The encoded protein has been shown to be involved in development of the nervous system, and for cells involved in the expansion of T cells and dendritic cells which play an

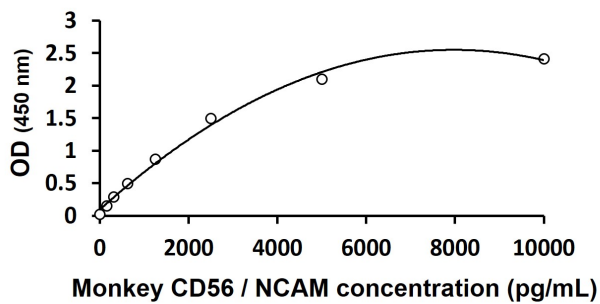

important role in immune surveillance. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Jun 2011]

**Function** This protein is a cell adhesion molecule involved in neuron-neuron adhesion, neurite fasciculation, outgrowth of neurites, etc. [UniProt]
