ARG82991 Mouse IL4 ELISA Kit Package: 96 wells Store at: 4°C or -20°C (depending on the component)

Summary

Product Description ARG82991 Mouse IL4 ELISA Kit is an Enzyme Immunoassay kit for the quantification of Mouse IL4 in

Serum, Plasma, Cell culture supernatants.

Tested Reactivity Ms

Tested Application ELISA

Target Name IL4

Conjugation HRP

Conjugation Note Substrate: TMB and read at 450 nm

Sensitivity 1.1 pg/ml

Sample Type Serum, Plasma, Cell culture supernatants

Standard Range 2.1 - 500 pg/ml

Sample Volume $50 \mu l$

Alternate Names BSF-1; IL-4; B-cell stimulatory factor 1; BCGF1; Lymphocyte stimulatory factor 1; BCGF-1; Interleukin-4;

Pitrakinra; Binetrakin; BSF1

Application Instructions

Assay Time 4.5 hours

Properties

Form 96 well

Storage instruction Store components at 4°C or -20°C. Keep microplate wells sealed in a dry bag with desiccants. Do not

expose test reagents to heat, sun or strong light during storage and usage. Please refer to the product

user manual for detail temperatures of the components.

Note For laboratory research only, not for drug, diagnostic or other use.

Bioinformation

Gene Symbol

Gene Full Name interleukin 4

Background IL4 is a pleiotropic cytokine produced by activated T cells, mast cells and basophils. It is a ligand for

interleukin 4 receptor. The interleukin 4 receptor also binds to IL13, which may contribute to many overlapping functions of this cytokine and IL13. IL4 elicits many different biological responses, but has two dominant functions. The first is regulating differentiation of naive CD4+ T cell to the Th2 type. Th2 cells produce IL4, IL5, IL10 and IL13, which tend to favor a humoral immune response while suppressing a cell mediated immune response controlled by Th1 cells. STAT6, a signal transducer and activator of transcription, has been shown to play a central role in mediating the immune regulatory signal of this

cytokine. The second is regulating IgE and IgG1 production by B cells. Two alternatively spliced transcript variants of this gene encoding distinct isoforms have been reported.
