# ARG83187 Rabbit TGF Beta 2 ELISA Kit

Package: 96 wells Store at: 4°C

#### Summary

Product Description ARG83187 Rabbit TGF Beta 2 ELISA Kit is an Enzyme Immunoassay kit for the quantification of Rabbit

TGF Beta 2 in Serum, Plasma, Cell culture supernatants.

Tested Reactivity Rb

Tested Application ELISA

Specificity There is no detectable cross-reactivity with other relevant proteins.

Target Name TGF beta 2

Conjugation HRP

Conjugation Note Substrate: TMB and read at 450 nm.

Sensitivity 15 pg/ml

Detection Range 31.2 pg/ml - 2,000 pg/ml

Sample Type Serum, Plasma, Cell culture supernatants

Precision Intra-Assay CV: 5.6%

Inter-Assay CV: 6.2%

Alternate Names TGF-beta2; Cetermin; LDS4; Polyergin; Glioblastoma-derived T-cell suppressor factor; G-TSF;

Transforming growth factor beta-2; LAP; TGF-beta-2; BSC-1 cell growth inhibitor

## **Application Instructions**

Assay Time ~ 5 hours

#### **Properties**

Form 96 well

Storage instruction Store the kit at 2-8°C. Keep microplate wells sealed in a dry bag with desiccants. Do not expose test

reagents to heat, sun or strong light during storage and usage. Please refer to the product user manual

for detail temperatures of the components.

Note For laboratory research only, not for drug, diagnostic or other use.

#### Bioinformation

Gene Symbol TGFB2

Gene Full Name transforming growth factor, beta 2

Background This gene encodes a member of the transforming growth factor beta (TGFB) family of cytokines, which

are multifunctional peptides that regulate proliferation, differentiation, adhesion, migration, and other functions in many cell types by transducing their signal through combinations of transmembrane type I and type II receptors (TGFBR1 and TGFBR2) and their downstream effectors, the SMAD proteins. Disruption of the TGFB/SMAD pathway has been implicated in a variety of human cancers. The encoded protein is secreted and has suppressive effects of interleukin-2 dependent T-cell growth. Translocation

www.arigobio.com arigo.nuts about antibodies 1/2

t(1;7)(q41;p21) between this gene and HDAC9 is associated with Peters' anomaly, a congenital defect of the anterior chamber of the eye. The knockout mice lacking this gene show perinatal mortality and a wide range of developmental, including cardiac, defects. Alternatively spliced transcript variants encoding different isoforms have been identified. [provided by RefSeq, Sep 2010]

Function TGF-beta 2 has suppressive effects on interleukin-2 dependent T-cell growth. [UniProt]
